

# CHARGING INTO THE FUTURE: FLAGSHIP HELPS LUXURY AUTO MANUFACTURER CREATE ULTIMATE EV CHARGING STATION

This auto manufacturer leads the way in luxury vehicles, delivering premium cars and vans worldwide with an unwavering commitment to excellence. The company has a massive and well-developed infrastructure throughout the United States, solidifying its global reach. They offer the most extensive and diverse lineup in the luxury car segment, with 16 model lines that span the spectrum from sporty to electric.

## ! THE CHALLENGE

The client aimed to provide an elevated experience for Electric Vehicle (EV) customers by installing the first-of-its-kind EV charging station at its Georgia headquarters. The station features six 400kW hubs as well as an amenity building where drivers can wait while their vehicles charge. After working with multiple vendors to develop the buildout, the client faced a delay during the final stages of construction. Not only did the client need immediate assistance to ensure on-time completion of the project, but it also required an ongoing maintenance plan to keep charging station operations running smoothly.

## ✓ THE SOLUTION

A trusted partner with a proven record of success, Flagship was brought in to ensure timely project completion. With its extensive experience in project management, Flagship expertly coordinated with multiple vendors to successfully facilitate the project closeout, construction punch list, and final stages of the commissioning process.

Flagship also completed post-construction cleanup and landscaping to enhance the aesthetic appeal of the newly constructed charging station. Additionally, Flagship developed a comprehensive maintenance and repair plan to guarantee the charging station's seamless and uninterrupted operation.

## ↑↑ THE OUTCOME

Flagship's meticulous project management efforts ensured that the luxury EV charging station was completed on time and fully operational. This premier charging station delivers an unparalleled brand experience for EV customers, providing a 10-80% battery charge in approximately 30 minutes. Meanwhile, the amenity building offers enjoyable comforts to customers charging their vehicles.

Flagship will continue its partnership with the client to provide onsite maintenance and assistance for both the charging station and amenity building. With the client planning to install 400 more EV charging stations across North America, Flagship anticipates its ongoing involvement in future buildout endeavors.
